About Me

Linkedin: www.linkedin.com/in/quy-nguyễn-đức

Portfolio: https://sinuyx.github.io/profile_CV/

Education

Major: Information Assurance (Information Security)

2024 - 2028

FPT University, Can Tho Campus

Skills

Soft-Skill: Communication Skills, Problem-Solving Skills, Teamwork Skills, Time Management Skills

Operating Systems: Working knowledge of Linux (Kali, Ubuntu) and Windows environments

Additional information

A third-year Information Security student at FPT University, Can Tho campus, with foundational knowledge of computer networking, SQL databases, and Python programming. Through coursework and simulated lab environments, I have developed practical skills in system configuration and network traffic analysis. Seeking a SOC Intern position to continue learning, enhance my hands-on skills, and develop my expertise in security monitoring and analysis..

Certifications

November 13, 2025 **CCNA: Introduction to Networks**

March 24, 2026 **CyberOps Associate**

March 25, 2026 **CCNA: Switching, Routing, and Wireless Essentials**

July 1, 2026 **CertNexus Certified Ethical Emerging Technologist**

Projects

Member **June 2026 - Present**

AI Classification and Mapping CTI into MITRE ATT&CK Techniques

Project Description:

Applied artificial intelligence to classify Cyber Threat Intelligence (CTI) and map threat intelligence content to attack techniques defined in the MITRE ATT&CK framework.

Responsibilities:

- Participated in experiments with text classification models using CTI datasets.
- Assisted with model training and evaluation using classification performance metrics.
- Explored the application of Natural Language Processing (NLP) and Transformer models for cyber threat intelligence classification.

Member **January 2026 - March 2026**

AI pronunciation trainer

Project Description: Developed an English learning application featuring practice exercises and text comparison functionality.

Responsibilities:

- Implemented the Levenshtein Distance algorithm using dynamic programming to compare two text strings.
- Developed functionality to calculate text similarity scores and identify differences between the reference sentence and user input.

Languages: English (Good reading comprehension of technical documentation and basic communication)
